

STANDARDS, INNOVATION, RESEARCH.

Check out:
[CEN-STAIR4SECURITY.EU](https://cen-stair4security.eu)

The STAIR4SECURITY platform aims to deliver the following core capabilities:

- I. One stop-access for stakeholders to easily locate information on state-of-the-art research, standards, pre-standardization activities, technical solutions, best-practices and guidelines they require for their day-to-day business;
- II. Engagement channel for stakeholders to submit their standardization and solution-related needs to the STAIR4SECURITY consortium for assistance;
- III. Consultation channel for the public and in particular expert-public to engage on topics on which the STAIR4SECURITY stakeholders require as well as expert opinions and inputs;
- IV. Networking mechanisms for researchers and practitioners to form partnerships and collaborations to tackle specific challenges; and
- V. A Governance mechanism to support the coordination of the CBRNE-DRR standards space for policy-makers, practitioners, researchers and standardizers and for the access management of specific entities on the platform.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 853853
